*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1 through 36 and 73 through 107, drawn to an apparatus for controlling the fluid flow through a pump and the air flow through a fan in a cooling system, classified in class 165, subclass 244+.

II. Claims 37 through 72, drawn to a method of controlling a fluid flow rate of a pump and an air flow rate of a fan in a cooling system, classified in class 165, subclass 267+.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus that is Invention I as claimed in apparatus base claim 1 can be used to practice a method, which, unlike the method that is Invention II as claimed in method base claim 37, necessarily includes the step of the controller (and not a user) receiving the sensed temperature value from the at least one temperature sensor. Similarly, the apparatus that is invention I as claimed in apparatus base claim 73 can be used to practice a method, which unlike the method that is Invention II as claimed in method base claim 37, necessarily includes the step of measuring the current consumed by the at least one cooled device.

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Art Unit: 3753

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ljiljana (Lil) V. Ciric whose telephone number is 571-272-4909. The examiner can normally be reached on Mondays through Fridays from 10:00 a.m. to 6:30 p.m.
